SLS System – Automatic Level Control for Gas Scrubber Applications

The Murphy Gas Compressor Scrubber Level System (SLS)

The system provides for liquid control in gas scrubber applications, by dumping liquids to drain and protecting compressors with a high liquid level switch. Wetted metal parts are made to survive constant use in corrosive environments.

You Save Money By Purchasing The SLS System Which Includes the Following:

- 1) LS200** High Level Shutdown Switch
- 2) DVU2120** Pneumatic Dump Valve
- 3) LS200NDVOR** Pneumatic Level Control with:
- 4) Filter Regulator with MURPHYGAGE®.**

For detailed information on Level Switches see LS-04004B and for Dump Valves see DVU-01069B.

Service Tip

The MURPHYGAGE® and Filter/Regulator on the LS200NDVOR help keep the control medium clean and dry. It also allows operator to adjust pressure to recommended level of 30-70 psig. The MURPHYGAGE® and Filter/Regulator are recommended to help increase system life and trouble free operation.
